Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Treibergs (U. S. Patent 6,045,370).
3. Regarding claim 1, Treibergs (see figures 2, 3) discloses an electrical connector assembly comprising: an insulative frame 12 comprising two opposite edges 30 and opposite first and second ends between the edges, a clip pivotally mounted to the first end of the frame, the clip comprising an extending portion and a post removably attached at the extending portion, and an actuator 54 pivotally mounted to the second end of the frame, the actuator 54 comprising a driver and urging means for urging the clip, wherein when pivoting the driver, the driver at all times remains substantially within the confines of the frame.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Treibergs in view of Shabbir (U. S. Patent 6,400,565).

6. Regarding claims 9-13, Treibergs discloses the claimed invention except for a replaceable/detachable solid post being attached to a distal end of the clip. Shabbir discloses a metal cover with a replaceable post 41. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Treibergs to use the metal cover with separate post as taught by Shabbir so as to help heat transfer.

Allowable Subject Matter

7. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. None of the reference discloses the urging means of the actuator is a cam, a first supporting rack and a second supporting rack are arranged on the second end of the frame, and the second end of the frame defines a slot between the first and the second supporting racks.
